A Note from
Harbor President

The Second Gear Grind

Each of us has a story of how we became custodians of Model As that are in our care. For me that day came when I was out for my daily walk.

I would walk past this old codgers house most days. "Bob" (Speaks) would always be working on his Model Ts and As. As I passed by I would ask him if he ever drove any of his cars or just worked on them all the time...

I also met this other old codger at Bob's house one day. Some of you may know him as "Art" (Wagner).

Being a car nut myself, I would always jokingly ask him if he wanted to sell any. I had my eye on a 1922 Model T "Center Door" Sedan he had. He would always say NO!!

Then one day Bob took me by surprise. He said the Ts were fun but a Model A would be better suited for driving around town and going on tours. He then said he had a '30 Town Sedan I might like. So Linda and I went and looked at the Ol' Girl and after much discussion, we brought her home.

But our story just starts with the Town Sedan. This next part involves Art. He mentioned he belonged to a Model A club. Which led me to Ursi (Schmidt), whom I had worked with for years at the Chevron Refinery. It's a small world after all.

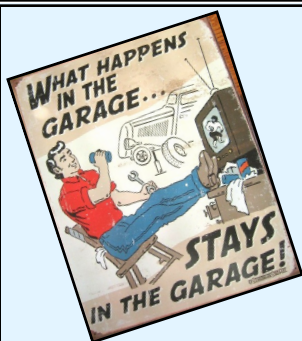

Without the purchase of the Town Sedan, we would have never experienced all the wonderful adventures with the Harbor Area Model A Club or met all of the great new friends we have made, not only just in our club but many like minded people that also enjoy Model As.

Who knew that an old Ford would bring so much happiness to our lives...

Now if I could just find second gear...

Till next time, remember, The world needs more kind people so don't forget your random acts of kindness.

Dennis

Editor's Corner

I have been going to the Friday afternoon car gathering at the old Ruby's in Redondo Beach on Friday afternoon. Lots of cars of all kinds there with a few Model As in the mix. Sadly, some of our old regular attendees are no longer with us. We use to have supper there, too, but Ruby's is now closed.

The annual summer picnic planning is coming together. Donniss and her team are working hard to make it a memorable event. Bobby D. has the Hubley race track all ready for the races. Hubley tune-up meetings are already in progress. Always a fun time. We celebrate the club's 67th anniversary this year at this event!

Stay tuned for more fun activities from the Activity Committee. They are working hard on future events.

Several of the Harbor Model A club members and other car enthusiasts of all car types meet to talk cars. There are some very nice autos and some nice people there, too!

The address is 17400 Hawthorne Blvd., Torrance CA. (at Artesia Blvd.)

Come on by and get your weekend started in true So. California style.

[2024 Membership, Roster and Club Merchandise Items](#)

Jim Huizdos has a selection of new **Club merchandise**. We have hats, shirts, patches, t-shirts and we still have 60th anniversary items for sale at a discount. More to come. The updated **2024 Harbor phonebooks/rosters** are available from Ursi free of charge through e-mail. Club members that don't attend events can request a phonebook/roster by mail. Contact **Ursi Schmidt** at 310-561-4895. Make sure Ursi has your latest info. **Just a note:** We regularly update the roster. If you have any address changes, phone number changes or email changes, let Ursi know. Let Dick Wyckoff know, too. He'll put the info in the *Harbor Light*.

Pat Tucker

Our long time member and dear friend passed away peacefully recently. She was a Harbor Club member since Feb 1965, almost 60 years! Her contributions to the club were many, but the ones most remembered were the BBQ events at her home and several safety inspections that she and her family hosted. She was a wonderful host and friend and will be greatly missed. RIP my friend.

A new addition in The Harbor Light!

Jim's Tech Tip

Ford originally used a fine mesh brass screen at the top of the glass fuel strainer bowl that's mounted to the Model A firewall. The bowl gives a place for water to settle into (water is heavier than gasoline) and a place for dirt and rust particles to collect.

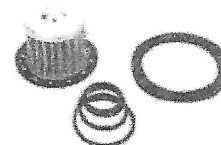

The screen also keeps these particles from traveling down to the carburetor (where you have another screen). With all these screens, I think Ford knew that gasoline supplies at the time were prone to contamination (more than today)

Many people have started to install a small pleated paper filter element in the glass bowl instead of the brass screen.

I'm not so sure it's needed; I think the brass screen is enough. The Model A has no fuel pump, it relies only on gravity feed, and I'm concerned about adding another restriction to the fuel flow.

But IF you use one of these paper filters, you need to know that the rust, dirt, etc. is trapped **INSIDE** the paper element, not on the outside of it like you'd think. Therefore, you can be collecting a lot of junk inside the filter, plugging up the filter element on the inside, and not even know it. One day, you lose all your power and the engine really acts like it is starving for fuel. You thought you would see the rust and dirt collect on the outside of the filter... but you don't. Surprise! (I hate surprises!)

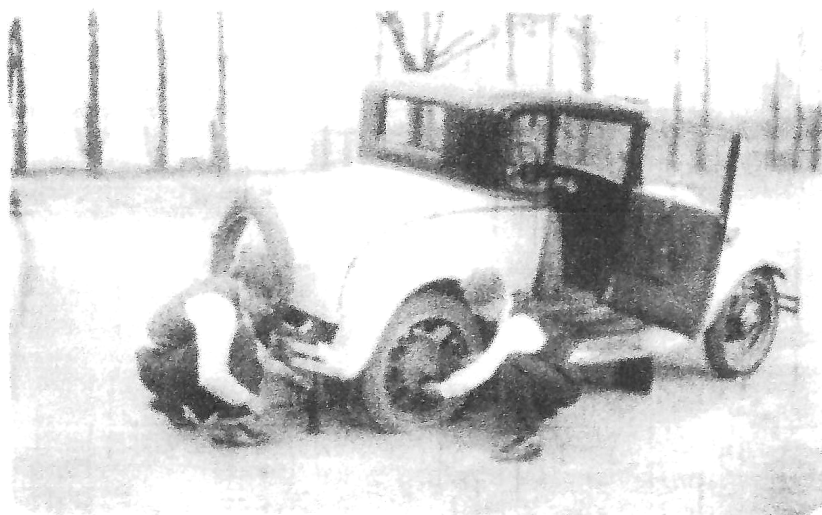

So, if you are going to use these pleated paper filters, get into the habit of replacing them regularly, maybe once a year, since you can't see how dirty they are inside. And carry a spare filter and gasket with you in the car. It's a pretty easy thing to swap out in a parking lot. Kind of messy, but it can be done without tools. Use some disposable gloves and you won't smell like gas for the rest of the day.

That's all for now. Keep driving, help each other out, and Have a Model A Day!

MAFFI Minute

Well, the MARC National Meet in Asheville will be over by the time you read this, and I'm hoping the MAFCA folks who were unable to have their meet because of wild fires got to join in the MARC meet. And, I'm really hoping you ALL get to Hickory Corners, Michigan -September 20 and 21 for Model A Days.

This year will be like no other . . . the commercial bus that so many have worked on and supported with donations is scheduled to be unveiled on September 20! And if that isn't enough excitement, the addition to the museum should be underway. We are literally just waiting for the proper permits to break ground!

We'll have all the usual fun in addition to the bus and expansion to view: the "first" start, museum cars, personal Model A's, Model A gifts, seminars, music, swap meet items, and more!

Did you get your "my A" plaque for the museum expansion yet (contact Val Maron at 847-951-5858 or email at TheMyAProgram@gmail.com), so that you and your car can have your name on the wall as part of the fabulous museum? Is your wardrobe updated with attire from Model A T-shirts (go to MAFFI.org and click on "store"), and did you get your Sweepstakes ticket yet (MAFFI.org), so you have a chance at a historic Model A? So many ways to support your museum . . .

There are less than 60 days until we all gather 'round to celebrate Model A Days!! I can't wait!

Cindy Ellenbecker, MAFFI Trustee/Secretary

What's a Hubley, and why would I want one? By Janet Winter—Historian

The Hubley Manufacturing Co. was incorporated in the late 1800s, before our time. Started by John (you guessed it) Hubley, he didn't start producing Model As models until around 1959. Their main competitor starting in the 1930s was the Tootsie Toy company which was using a Zinc alloy ("Mazac"), a more modern material than the cast iron used by Hubley from the beginning.

Being a newbie, I had no idea what a Hubley was. I'm now the proud owner of what I hope will be a very fast pickup. Ready to race!

The company made a very diverse line of products over the years in addition to our 1:20 scale Model As: tractors; motorcycles, even with sidecars; dogs; metal banks; and other cars like 1932 Chevys, Packards, Duesenbergs, and a few later models.

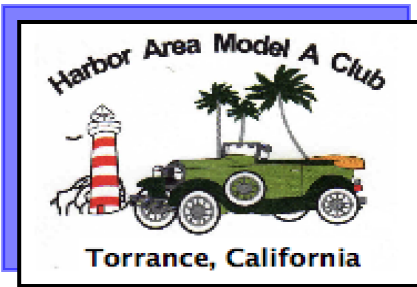

Our Model As were produced between 1959-1974, manufacturing the models for almost four times as many years as the production of our full-size cars!

Hubley experimented with, and in some cases used, plastics and different metals, especially during World War II and the resulting metal shortages. Some of the toys made mid-century used plastic. For the sake of racing, I think we're glad that the As were all metal!

Unfortunately, by the mid-70s, Hubley was out of business, which explains the smaller number of kits and cars currently available. Ultimately, CBS Toys acquired Hubley around 1980 and consequently sold the dies to Scale Models. It's possible that they still exist---somewhere. Some believe that Hubley suffered from an identity crisis by making so many different types of product lines. But we're glad that they chose to make seven types of Model As: the Roadster, Town Sedan, Coupe, Station wagon, Victoria, Phaeton, and my personal favorite, the Roadster pickup.

See you at the track in August!

The Harbor Area A's meet monthly on the last Friday of every month at the Waleria Park Clubhouse, located at 3855 W. 242nd St. in Torrance, California. Meetings begin at 7:30 PM (The park is located about 1-1/2 blocks west of Hawthorne Blvd. and one block south of Pacific Coast Hwy.) We'd like to invite all interested parties, even if they don't own a Model A Ford, to come and join us. Our goal is to educate the public about Model A Fords and have fun while doing it.
